CRAFTED TO ENGAGE THE SENSES.

The curated details and premium materials work in harmony to bring together man and machine like never before. Stelvio also maximises its SUV design with 525 litres of fully usable boot space that can become even greater by folding down any of the rear seats. Even if you have your hands full, open the tailgate by using the hands-free tailgate. If your key fob is close by, just pass your foot under the rear bumper, and the tailgate will automatically open*.

BENEFIT-IN-KIND TAXATION

The company car Benefit-in-Kind Taxation scale is linked to the CO2 emissions level. The table right shows the percentage of the car price to be taxed (P11D value). A simple explanation of how to calculate BIK is shown below.

EXAMPLE OF HOW TO CALCULATE BIK

1. Look at the table on the right and find the BIK tax banding to be applied according to the CO2 emissions of your car. (For example a car emitting 99G/KM CO2 is 24%).
2. Work out the car's price to be taxed (P11D value) which is calculated as: Total Retail Price (Basic Price + VAT) + Number Plate (£25.53) + Delivery costs (£700) + Options (Including VAT).

3. Calculate the BIK as follows: P11D value x BIK tax banding percentage.

4. Multiply BIK figure (from 3) by your personal tax band – i.e. 20% or 40% to give your annual BIK costs.

2023-25 % BIK RATE
